SUMMARY

Frontend software engineer with 8+ years of experience building React and TypeScript applications for reporting, interactive maps, and 2D and 3D engineering tools.

EXPERIENCE

Dyno Nobel | Software Engineer May 2021 to present

- Build frontend applications for blast reporting, analysis, and design. Built shot reporting workflows, a CSV editor, and the Fracture Density Model end to end.
- Developed 2D and 3D Burden Control tools with hole previews, navigation, measurement, PDF previews, and boretrack support.
- Led the migration from Flow to TypeScript across core application areas and migrated Enzyme tests to React Testing Library.
- Introduced Storybook, expanded unit test coverage, improved Jenkins test sharding, and helped establish Playwright testing.
- Forked MUI v4 and its pickers to support React 19. Built internal code review and onboarding tools.

RoviTracker | Frontend Developer November 2018 to March 2022

- Advanced from QA automation to frontend development on an equipment and fleet management platform.
- Built responsive React and TypeScript interfaces for inventory, equipment profiles, maintenance, and reporting.
- Developed Google Maps tools for asset search, filtering, geofence drawing, and boundary editing.
- Created Cypress tests for registration, login, and onboarding on desktop and mobile, with scheduled runs in GitLab CI.

PROJECTS

Wild Haven wild-haven.app

- Rewrote a legacy PHP/MySQL website in React and TypeScript and maintain the application.
- Built character profiles, inventories, quests, combat, community forums, messaging, and artist marketplace tools.
- Built Bun-based Appwrite Functions for gameplay and community operations, with server-side authorization and staff permissions.

TECHNICAL SKILLS

Frontend and UI: React, TypeScript, JavaScript, Redux, Zustand, HTML, CSS/SCSS, Material UI, shadcn/ui, Tailwind CSS
3D and data visualization: Three.js, React Three Fiber, Mapbox, Google Maps API, Leaflet, Recharts
Testing and development: Vitest, React Testing Library, Cypress, Playwright, Storybook, Vite, Git
Backend and CI: Bun, Node.js, Appwrite, REST APIs, Jenkins, GitLab CI

EDUCATION

Utah Valley University | Bachelor's degree in Computer Science, May 2026. Full-stack development focus.

Bottega | Software Engineering certificate, 2018. JavaScript and Python boot camp.

INTERESTS

3D modeling, 3D printing, Dungeons & Dragons, and video gaming
